The bathroom – a place of rest, relaxation, and comfort.

We have made it our mission to take your everyday life to new heights of quality, comfort, service, and aesthetics with our bathroom products. In the production of our faucets and showers, we emphasize the use of high-quality materials and components, as well as precise workmanship and lasting functionality. Our faucets and showers feature both modern and timeless design and innovative technologies that improve ease of use and help save energy and water - without compromising on performance or comfort.

16

Balcoon

The Balcoon series by Patricia Urquiola creates a fascinating combination of modernity and timeless elegance - puristic and at the same time with a strong design identity.

18

Manhattan

The dominant design element for Manhattan is the cube. Precise lines and edges characterize the design language full of character, which are additionally emphasized by fine light reflections and create a high-quality look.

20

Wave

Wave represents a young, modern design style. The slender, cylindrical base body flows smoothly into the spout, which is finely rounded at the front and creates an exciting contrast with precise edges.

Sustainability

We have a responsibility to our environment and mankind, to present and future generations. That is why we treat our resources with respect. In order to fit the different life situations and lifestyles of our users, we develop ideas and manufacture products that prove to be highly functional, durable and sustainable, especially when dealing with water.

Duravit works intensively on a wide range of sustainability topics related to sustainable building certifications and environmental declarations/EPDs for our taps and hoses. The rapidly growing demand for resource-saving and efficient products is already being met by Duravit features such as MinusFlow, FreshStart, and EasyClean. These features enable our products to be used in building certifications such as LEED/BREEAM or the DGNB, making an important contribution to our environment. To this end, our product range is being continuously expanded and extended in order to be able to meet all national requirements worldwide with regard to sustainable (building) certifications in the future.

Sustainability Goals until 2030

Water

We're increasing our proportion of products with water-saving technologies to more than 80 percent.

Climate

We're reducing our global carbon emissions by 20 percent.

Ressources

We're increasing the proportion of recycled materials in our products to an average of 30 percent.

People

We're investing 0.5 percent of our annual company profits in global partnerships as well as in maintaining a high level of employee satisfaction.

Highest quality

Long-lasting products can only be created to the highest standards. At Duravit it begins with the selection of high-quality materials. For example, our reliable and high-quality ceramic cartridges that promise a long service life. Our products are manufactured using perfect combination of craftsmanship and the latest technologies. Before they are launched on the market, the faucets and showers are subjected to strict tests in terms of quality, washing comfort and spray behavior.

Our promise of guarantee

Duravit places great emphasis on extreme precision and sustainability in development and production. Duravit provides a voluntary five-year guarantee for all faucets and showers, as well as a 15-year availability guarantee for spare parts.

HeatLock

An integrated safety lock at 38 °C ensures that bathroom faucets with HeatLock do not pose a risk of scalding. This is especially practical and safe for children and the elderly.

FreshStart

Duravit FreshStart faucets provide full control over hot water consumption, effectively reducing energy needs in everyday life. Only cold water is allowed to flow when the lever is in the middle position. For hot water, it has to be actively turned to the left. This way, water is heated only when it's really needed.

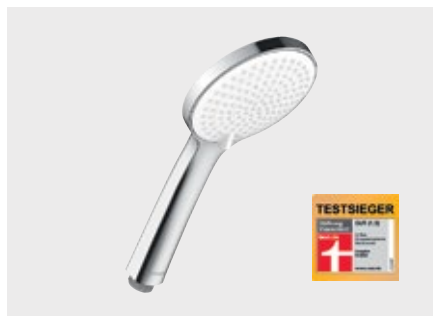

AquaControl

With the flexible AquaControl aerator, the exit angle of the faucets' water jet for the washbasin can be easily changed with your finger. The 20° (+/-10°) adjustment is an easy way to avoid unsightly splashing.

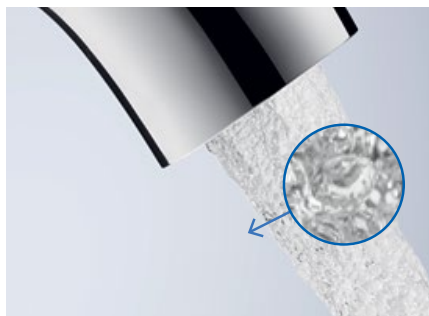

Promise of guarantee

Learn more about u promise of guarantee here:
www.duravit.com/warranty

MinusFlow

A flow restrictor limits the flow rate from the outlet. This decreases consumption significantly. At 3.5 liters per minute, MinusFlow faucets use 40% less water than standard faucets, and MinusFlow hand showers are a resource-efficient 9 liters per minute, and a 40% savings.

AirPlus

AirPlus provides a full, soft jet, as the water in the aerator is enriched with air.

Touchless

Thanks to infrared sensors, water flows exclusively during use and allows for completely touch-free operation. This not only saves resources, it is also highly hygienic.

EasyClean

EasyClean equipment is another feature. This makes cleaning overhead showers, hand showers, and washbasin faucets a breeze. Thanks to EasyClean, it's easy to rub limescale and dirt deposits off of spray discs and aerators. This saves time during cleaning and removes the need for aggressive cleaning agents.

Click!

On hand showers equipped with Click! technology, it's easy and convenient to select the desired spray mode at the touch of a button.

Best Match

Finding the perfect combination of faucet and washbasin can be difficult. With Duravit Best Match, you can simply click on the model and view the matching recommendations. Special test methods determine the ideal combination.

Design

Design that surrounds us has a huge impact on how we feel. Design is emotion. That's why our philosophy is that design needs to adapt to people's needs in terms of aesthetics, functionality, and sustainability in production and use. To achieve this on a global scale, we collaborate with an international

Philippe Starck

Starck's design defies categorization. His designs are true icons. This is also demonstrated by the bathroom and faucet series for Duravit, such as White Tulip, Starck T, and Tulum.

White Tulip

Tulum

Starck T

Kurt Merki, Jr.

Merki designs his products following the philosophy of "Culture, meaning, and life" – including the Vero and XSquare bathroom furniture series and the C.1 faucet series for Duravit.

C.1

network of designers – from renowned greats like Philippe Starck and Patricia Urquiola to young talents like Bertrand Lejoly and Kurt Merki, Jr. Their ideas, combined with our expertise, give rise to diverse designs and novel approaches that are at once individual, stylish, and exclusive.

Bertrand Lejoly

With a deep knowledge of architecture and interior design, Lejoly creates holistic (bathroom) spaces. He created the D-Neo complete bathroom series for Duravit.

D-Neo

Patricia Urquiola

Her Balcoon bathroom range creates a fascinating combination of modernity and timeless elegance - minimalistic yet also with a strong design identity.

Balcoon

References

House of Reminiscence | Japan

Located in a quiet residential area in Tokyo is the House of Reminiscence – a property renovated with the latest technologies that provides space for traditional customs and art. The bathrooms are fully equipped with Duravit products, including concealed single-lever faucets from the C.1 faucet series, Luv and 1930 washbasins, and Starck tubs and urinals.

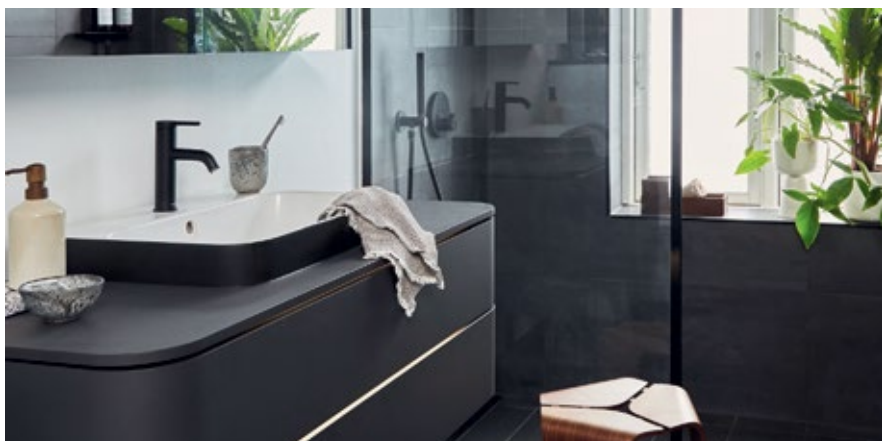

Hyde Park | The Netherlands

More than 3,800 high-quality apartments and studios are set to be built on the 100,000-square-meter site of a former office park, with the first residential block completed in 2022. Each of the six apartment blocks was planned individually and offers a wide variety of apartment types. Duravit is a premium partner for all bathroom furnishings and has integrated the C.1 and White Tulip faucet series.

Burghotel Falkenstein | Germany

At 1,250 meters, the Falkenstein Castle Hotel sits enthroned at the foot of the castle complex of the same name and the highest in Germany. This gourmet hotel knows how to inspire with renowned cuisine and distinctive interior design. Full-range supplier Duravit is represented with freestanding single-lever bathtub faucets from the C.1 faucet series as well as Luv and White Tulip.

Samira Kudsk and Søren Ellitsgaard | Denmark

Samira Kudsk and Søren Ellitsgaard place great emphasis on aesthetics coupled with a touch of luxury in their home environment. In their classic 170-square-meter apartment in Copenhagen's Frederiksberg district, however, the bathroom eked out a rather sad existence. They put off the renovation for quite some time until they decided on a complete renovation with Duravit products. Special eye-catcher: The C.1 single lever faucet in Black Matt .

Balcoon

Patricia Urquiola designed faucets for the wash-basins and above-counter basins, bidet, shower, and bathtub to match the design of the Balcoon range and perfectly complement the harmonious overall picture. The elliptical handle transitions into the faucet body in a gentle curve, making it particularly pleasant to hold. Three surface variants – Chrome, Black Matt and Brushed Stainless Steel – give the bathroom furniture its finishing touch and round off the range's harmonious color spectrum.

Make it match!

Duravit opens up a completely new design potential in the bathroom with faucets, showerheads, furniture details, and accessories in five tasteful finishes. The high-quality, scratch-proof PVD surfaces (Polished Gold, Brushed Bronze and Brushed Stainless Steel) mean that individual and appealing bathroom creations can be realized without complex renovation work. The harmonious color concept is a consistent component of Duravit's product portfolio, so that every item of bathroom equipment can be coordinated.

Finishes

With Chrome, Black Matt, and three other durable, scratch-resistant PVD finishes – Brushed Stainless Steel, Brushed Bronze, and Polished Gold – Wave offers additional attractive options for custom bathroom design.

Accessories

Small effort, big effect. With matching accessories, the bathroom or guest restroom can become a pleasant atmosphere of wellbeing in a well-rounded look, with just a few simple steps. Designed in a uniform aesthetic language, the right products can be found for every interior style, every faucet design, and all needs.

Mounting

Mounting by drilling isn't possible everywhere, which is why Duravit now also offers the "Starck T" series as a self-adhesive variant. Both fixing options included in the scope of delivery.
